It is both outrageous and startling that the World's collective consciousness regarding public health and epidemiology research in general and cancer has explicitly been held captive and, more frequently, willfully captivated by greedy geopolitical alignment.

Forty million people died of cancer from 2020 to 2023; my oldest daughter died of cancer at the age of 36, memory eternal Eleni Soumela.

The Maillard Reaction was published in 1912. Louis Camille Maillard warned that it was dangerous to heat newtrients above slowly simmered. Higher temperatures and lower humidities convert absorbable, functional, and immune strengthening ionically bonded newtrient polymers into permanently covalently bonded nutrient polymers. These are toxically mood and physically compromising antigens like microplastics.

A PubMed search of Maillard reaction products and cancer materialized 2,762 peer-reviewed and editorial board reviewed articles.

Also known more than two hundred million cancer deaths ago, nutrition causes cancer by surging redox imbalance, cell swelling, inflammation, cell death, RNA and DNA malfunction, crippling the immune system, and reprogramming the immune system to cause the long list of so called food allergies, seasonal allergies, autoimmune disorders, and cancers.

G. Trinchieri published Biology of Natural Killer Cells in a 1989 issue of Advances in Immunology, three hundred million cancer deaths ago. Natural Killer (NK) cells are ruthless immune system agents that attack and destroy life-threatening cells, including cancer.

A PubMed search of Maillard reaction products and natural killer cells materialized 45 peer-reviewed and editorial board reviewed articles. Nutrients kill natural killer cells, and newtrition rehabilitates and creates new killer cells.

A PubMed search for 'cancer drug' materialized one million eight-hundred thirty-four thousand eight hundred eighty-six (1,834,886) peer-reviewed and editorial board-reviewed articles.

Nutrition has become the most significant bioweapon of mass destruction launched by the same politicians and corporatocracy that continue to zealously work to prevent the new US President from taking power on January 20, 2025. And clean up corruption in Public Health and Epidemiology globally.

Let's pray, hope, and witness whether evil or good wins this next battle for World wellness and peace.
