

Terrestrial Projection of The Photon-Belt

Denes Joo

Architect-Urbanist, Hungary

ABSTRACT

This short "synthesis of syntheses" attempts to reflect my original new conception about the really credible world-view and view of life, as result of my six decades scientific research, taking into consideration the known sources and new interpretations/conclusions referring to the cosmic structure, functioning and manifestations in terrestrial context, especially of the **Photon-Belt**. Some ideas, drawings or tables taken over from my earlier short syntheses appear every time in new context, maybe with modifications/completions, with new meaning. Started from the idea of the **similitude between the "extended complete periodic systems" on every cosmic evolutionary level** – with exemplification of the **PHYSICAL** and **ASTRAL** levels – result very surprising new ideas, e.g.: 1) - the **synergetic pattern** of the conic-toroidal structure, vortical functioning and matricial aspect makes possible the most comprehensive modelling of the cosmic evolution, explaining the **similitude** of the **bionic extended whole periodic systems** of the chemical elements within the progressive fractal cosmic levels; 2) – this reciprocal **similitude** is based on the **etheron-creation from the light and etheronic evolution** of the elements **each from another** through a "pulling and pushing" mechanism; .3) – the **etheron-creation** and **etheronic evolution** exemplified on the **Physical** and **Astral** cosmic levels are based on the **Iovitzu-Ionescu-Joo 3-elliptic model of the PHOTON-BELT**; 4) – this model itself is based on the discovery and characteristics of the **ETHERON**, with its (bio)photonic, gravific, bimetric, bifocal connections and their cosmic implications; 5) – the **projection of the Photon-Belt in the North-African territory** permits the explanation of the terrestrial global and particular phenomena, like the divine and human social evolution, energetic and structural evolution of the Earth, localization of the former gravific focus of the **Photon-Belt** – the former constellation **PHOENIX** – and of the sank tectonic shield **ADRIA**, with determinant role in the former Atlantic and European Civilizations, respectively within a possible future evolution of the **New Europe** and **New Africa**, including the whole Sahara and Sahel-Belt, in correlation with the outlining of the Big Eurasian Continental Unity.

Motivation and historical background Extending of the concept "Cosmic Home"

Within the tumultuous multimillionnaire terrestrial history, the extremely diversified humanity arrived to a Hamlettian crucial point "to be or not to be", alternatively formulated by Albert Camus – accentuating the Ecoumenic component of the 3-Eco existential system Ecoumeny-Ecology-Economy – „if will exist the 21st century, it will be religious". In any case, it exists every time(s) a third solution's possibility too. It would seem that the Darwinian principle of the natural selection is functioning in fact only on cosmic level, far beyond the terrestrial one, where – at the contrary – as a consequence of an antidivine selection, the humanity is dominated by a minority of antihuman entities, which abuse one's position. This is not fair, not only on the terrestrial, nor on the cosmic scale! It is not fair to abuse first of all the **time-question**, the **cosmic architecture** – its real shape, structure and functioning – and its galactic, photon-beltic, solar and terrestrial consequences, the parallel inter-/sub-/supra-terranian and different dimensional more or less human civilizations, the multitude of genetic, other material, energetic and informational manipulations, a.s.o.

Intending to remediate somewhat this situation, after six decades multilateral research I elaborated a new cosmic architectural conception based on the **Whole Periodic System of the Chemical Elements**, in the **first phase** extending the official recognized **Pediodic Table** of 118 elements to the **Etheronic Structured System** of 558 elements and the pre-elements **Gluon** and **Quark**, preceded by the **ETHERON** as start and transition element between the similarly structured cosmic levels, in the **second phase** followed the **Extended Whole Periodic System**, including the series of the life-holder **Bionic Elements** as promoters of the whole dynamic system.

In the **third phase** resulted the generalization of this pattern within the **Dynamic Dual (DD) Cosmic Evolutionary Model** in form of a chromatic musical system like **Big Cosmic Cycle** composed by 5 pentatonic and 7 octavic **cosmic evolutionary levels**. In the **fourth phase**, within the **Conic-Toroidal Model of the cosmic evolution**, detailing the **Horn-toroidal pentatonic to the octavic transitional sequence**, resulted the analysis of the **elementary cone**, namely of the basic **cosmic fields represented as conics**.

In the **fifth phase**, analyzing the **Elliptic Conic Section** as the **Planar Light-field** – based on the similitude with the **PHOTON-BELT** – and the **Spherical Dark-fields** connected to the focuses/foci, resulted a **new vision of the MATTER CREATION MACHANISM through unification of the PLANAR/BRIGHT**

and of the **SPHERICAL/DARK LIGHT-COMPONENTS**, namely of the **visible/BRIGHT** and inside the **Dandelinspheres** included **gravific/DARK LIGHT – DUALITIES**. Consequently, the **MATTER** – starting with the **ETHERON** and continuing with the **GLUON, QUARK, BION** and the series of the **ELEMENTS** each from another – is created as result of the **interaction between the planar/flat/visible/bright and globular/invisible/dark/gravific/massive LIGHT-COMPONENTS**, namely between the **PHOTON** and **GRAVITON**. This means that the **GRAVITATION IS LIGHT TOO**, so **ALL IS LIGHT**, but differentiated on the **cosmic evolutionary levels**.

Based on these forbidden informations, it is possible to create a new worldview and vision of life, suitable for the new cosmic evolutionary phase, with transition from the **ATOMIC** to the **ETHERONIC ERA**. This extending of our knowledge means at the same time the endeavour to expand our natal-local-regional-continental-terrestrial **HOME** to a solar – photon-beltic – astral-galactic – universal **COSMIC HOME**, including finally the **WHOLE UNIVERSE**, or more exactly to reconquer our divine aura received in the moment of the conception, expressed as ascendent or descendent dimensional capacity, in conformity with the Golden or/and Apocalyptic Series.

Historical background of the Photon-Belt

The history of the properly speaking **Photon-Belt research** is comparatively young, a new product of the New Age Movement, started in 1961 with the „discovery with artificial satellits by our scientists of an immensurable big lightbelt in the vicinity of the Pleiaden” [1], but the authors of this book consider the first discovery as made by Edmund Halley around 1700, searched by Friedrich Wilhelm Bessel around 1800, and discovered by Paul Otto Hesse of the **Pleiadian local Photon-belt perpendicular to the movement of the Pleiaden** in 1950 [2].

However, this “**photon belt**” **IS NOT THE TRUE PHOTON-BELT!** The Alcyone-central Pleiadian „photon belt” is only an appearance, a vestiges/remnant after the conquest of the really true **Photon-Belt**, it is a malignant tumour/neoplasm within the organism of the real one! The Pleiaden star-agglomeration within the constellation Taurus/Bull – which is only one of the six turning-points of the genuin **Photon-Belt along the way of the Sun** – has a secondary energetic and spiritual importance, being the last deity **Nephtys** within the Egyptian **Enead (11)**.

Contrary to the official recognition of this hypothetic „photon belt” – based mainly on the P.O.Hesse’s ideas – it exists a true **Photon-Belt (1)** as astral-galactic Chakra at the exterior end of the Orion irregular 5-th Arm ejaculated from the core of our Milky Way Galaxy. In the whole first half of the year 1960, before the final examination within the middle-school in Szeklerkreuz, Harghita County, Transylvania, Romania – alongside the usual daily activities, between two near-death states – I travelled with my light-body/speed of light through the Universe, wandering all over the **Photon-Belt** too, later analysing my experiences referring to the seen events in [3], namely the **cosmic structure** of the **Photon-Belt (10)**, respectively the **divine coordination (11)**. Within the global structure and functioning of the **elliptic Photon-Belt** there are remarkable the communication possibilities, but exclusively through the reflexion between its focuses, situated at the **Ecliptic North-Pole** in the centre of the Polar Circle/the galaxy „Cat’s Eye” NGC 6543, respectively at the **Orion-Stargate** in the intersection of the Ecliptic with the Orion-Arm (1). This possibility is available in the case of both giant planets of the **Photon-Belt** in form of **Nibiru-Sun** and **Sun-Habiru** axes too, within the suitable ellipses,

respectively in the special case when they approach simultaneously the **Sun (7, 10,13) [4,5]**.

Cosmic evolutionary models

Conic-toroidal cosmic evolutionary model

In conformity with Nándor Várkonyi’s vision, the **foundations of the ALL are the light-bubbles [6]**. In conformity with my vision, the **light-bubbles are created as centres/apexes/zero energy points/light-points** of the **Horn-toroidal phases/transitional moments** of the **conic-toroidal structures** within the cosmic evolutionary unities of every levels (2) [7] The **Elementary Light-Bubble Unities (ELBU)** constitute the **DIVINE WORLD**. Substituting the expression “**atom**” – with meaning of unsplitable/indestructible – with the “**ETHERON**”, through the 7x7 and 49x49 **multi-spiraled unification** of the **ELBU-s** result the **etheronic structure** constituted by **13,840,566,901 light-bubbles**, namely by the first/**Tachionic Etheron [8] (2,3,4,5)**. Because the Tachionic Etheron’s mass [kg] resulted the Noethic Etheron’s mass divided with the suitable cosmic ratio, namely $1.9989 \times 10^{-106} : 6.7507 \times 10^{34} = 1.3494 \times 10^{-139}$ kg, results the light-bubble mass = 0.975×10^{-149} kg. **So, the light-bubble has mass! I consider, THIS IS THE DIVINE PARTICLE, NOT THE HIGGS BOSON!**

Starting from the **apex** in both directions – up and down, but not simultaneously – will evolve the succeeding cosmic levels, as elliptic sections/conics of the expanding cone (2) [9], quasi-radial from the successive centres of the suitable torus (3). Between the **elliptic light-planes** will evolve the larger and larger **Dandelinspheres**, tangent in the **alternating elliptic focuses**, with a balancing moving around the **energetic axis of the cone**. In this way is realized the spring from a cosmic level to another, every level starting with its suitable **ETHERON** and finalizing with the element nr. 558. Because really all these **elliptic light-planes** are **Photon-Belts**, we can generalize this concept to the whole conic-toroidal evolutionary Big Cycle, similar one to another.

Within the **conic-toroidal structure** all events take place in the **space** (interior of the cone/exterior of the torus), time (exterior of the cone/interior of the torus) and in spacetime (conic surface/superficies). The elliptic section/ light-field/**Photon-Belt** is bordered by the **spacetime**, the interior events take place only in **space**, without **time**.

Vorticial cosmic evolutionary model

Within this **conic-toroidal - vorticial - matricial synergetic model**, the **Vortex of the Dynamic Dual (DD) Cosmic Evolution (4)** is composed by 6 segments, namely 1 octavic with 7 cosmic levels and 5 pentatonic segments/levels (5). For this reason results the vorticial functioning order, after the wandering all over the **Extended Whole Periodic System** following the 5 pentatonic phases through the suitable **Dandelin-sphere**, one octavic series corresponding to one pentatonic segment. All these evolutions presented in 2D in reality follow spiral-like ways and volute-like planes in 3D, but with possibilities to present them in higher dimensions too.

Matricial cosmic evolutionary model

The above sketched complex cosmic evolution is inscribed really within a **3D matricial frame**, which contains a vorticial and a radial direction, respectively a time-axis (8), the model itself being the quaternionic resultant of these 3 components. Another presentation of the **Dynamic Dual (DD) Cosmic Evolution (5)** details the both – **octavic and pentatonic – evolutionary phases**, along a **Big Cosmic Cycle**, with a corresponding matrix of the Noethic-Etheric-Physic-

Astral-Universal **Big Quint** within the **Big Cosmic Octave (9)**.

Etheron-creation and Etheronic evolution

Etheronic evolution on Physical Cosmic Level

The discovery of the basic material constituent followed a quasi-logarithmic 2-millennar – 2-secular – 2-decadal way, from the ancient to the modern “**a-tom**” (**unsplittable**), from the re-discovery and completion of this batch, and from the discovery of the **ETHERON**, of which recognition is in progress. After many centuries, trials, the **ETHERON** was discovered in 1982 by the eminent Romanian Acad. Prof. Em. Dr. Ioan IOVITZU Popescu [10,11,12] and evolved with His Academician Colleagues N. IONESCU-Pallas and R.E. Nistor [13,14,15], but not recognized till today, contrary to my modest trials to take over this relay [16,17,18,19] within the proposed **IOVITZU-IONESCU-JOO MODEL OF THE PHOTON-BELT (6,7,10) [4]**. In this model the elliptic lightplane’s section with the conic surface/spacetime is described by the generator on the rotating cone.

Starting from the global structural similarity between the **PHOTON-BELT** on Astral-Galactic Level [4,20,18] and the Extended Whole Periodic System [16,17,8] resulted the detailed comparison of both structural levels (6,7,10), with reciprocal feed back, surprising results and conclusions within the above sketched new context. Attributing the **Etheronic structure and functioning** to the above sketched **conic-toroidal–vorticial–matricial synergetic cosmic evolutionary model**, it consists of an **elliptic conic section/light-plane**, with moving of a **special biophoton** along its elliptic trajectory, constituting a **common focus** of the other two elliptic trajectories, of which secondary focuses the two **polar biophotons** are, these trajectories crossing the suitable focuses of the main ellipse. In this manner the **four-times controlled special biophoton is directed by the Elementary LightBubble Unity/ELBU/Divine Particle, through the generator of the cone, on its surface/in the spacetime (7)!**

Within this Hamlet’s Mill like system is differentiated the forming of the **timeless elements Etheron-GluonQuark-Bion through SYSTEMIC summing up by 1-2-3-5-fold RESONANCES** through the focuses – the Gluon and Quark instantly forming Protons and Neutrons unified in 1H and 2He, respectively the first “driver” Bion – and the creation of the **other elements inside the spacetime along the Dandelin circles through ADDITIONAL summing up of the ETHERONS, forming the new elements each from another**. In both cases the coming into being/materialization of the elements is realized through the unification of the light-plane or light-straight in the suitable tangential point of the **Dandelin-sphere**, namely in the elliptic focus in the first case, respectively at the tangential point of the **Dandelin-circle** and the **conic generator** in the second case. In every case, the double perpendicularity is exclusive for the **matter creation**, and the triple perpendicularity for the **genesis of life** (hexagesimal angle of 76° by Dürer [17,21] (2)), in correlation with the following condition.

The **macrostructure** of a **life-cycle** of the 558 elements is constituted by the series of the 13 life-holder **BIONS**, which separate 12 groupings, of which central elements – in the case of many rows within each row of the group IV.A. Transitional Metals – will form the basic constituent elements of the living organisms with the suitable driver Bions, namely 6C/**B2**, 14Si/**B3**, 32Ge/**B4**, 50Sn/**B5**, 65Tb, 82Pb/**B6**, 97Bk, 114Fl/**B7**, 129,146,164/**B8**, 179,196,214/**B9**, 229,246,261,268,286/**B10**, 301,318,333,340,358/**B11**, 373,387,402,409,427,442,456/**B12**, 471,485,500,507,525,540,554/**B13** [16]. The above mentioned matricial presentations (8,9) include this **whole life-cycle** of 32 M years=4 **Photon-Belt Cycles** of 8 M

years=the way between two regular arms of our Milky Way Galaxy [5]. In any case, this vision is in contradiction with the recognized theories of Fred Hoyle and others’ referring to the „synthesis of elements from Hydrogen”, „in stars”, and all variants of the nucleosynthesis theories in general, which with their basic logical mistakes can’t explain the discussed cosmic phenomena.

Etheronic evolution on Astral Cosmic Level

Contrary to the Pleiadian Alcyone-central Photonening theory/model [1], based on the similarity with its above sketched description on **Physical Level (6,7)**, my conclusions referring to the Architecture – form-function-structure – of the **Photon-Belt** detailed in [5] are the following (10).

The actual Photon-Belt Cycle started from the Myozen-Spring 6.5 M years ago, at the start of the III. Big Octave within the terrestrial evolution [22], the Solar System being that time in the vicinity of the constellation Lyra/loadstar VEGA, with levogyre moving in the direction Hercules/RASALGETHI, Bootes/ARCTURUS, Coma Berenices/ALFA, Leo/REGULUS, Canis Minor/PROCYON, Canis Major/SIRIUS, Orion/ZETA/OSIRIS, Taurus/ALDEBARAN, Triangulum/ALFA, Andromeda/SIRRAH, Cygnus/DENEK, and back to Lyra/VEGA.

The **Divine Coordination** of the actual **Photon-Belt Cycle (11)** is divided into 6 phases correlated with the terrestrial geophysical periods **Myozen Superior** the **1st** and **2nd** phases (6.5-5.2-3.9 M), the **Sungod** alone, **Plyozen Inferior** the **3rd** phase (3.9-2.6 M), 4 Deities, **Plyozen Superior** the **4th** phase (2.6-1.3 M), 9 Deities/**Enead**, **Pleistozen Inferior** the **5th** phase (1.3 M-PRESENT), 16 Deities, **Pleistozen Superior** the **6th** phase (PRESENT-1.3 M), 25 Deities. After the first 2 phases, the 1-2-3-5-quaternionic divine “teams” are in correlation with the **resonance-like systemic summing up of the etheronic structuring of the core-elements**.

In conformity with the IOVITZU-IONESCU-JOO 3-ELLIPTIC MODEL the **Photon-Belt’s 2 poles on Astral Level** are the **SIRIUS** and the **VEGA**, which are the focuses of their own ellipses, of which another common focus the **ASTRAL BIOPHOTON SUN** is, these both secondary ellipses with **metrics/periods** of 3,600 respectively 5,200 terrestrial years going through the suitable **2 focuses of the main ellipse**, along which the **SUN** evolves with a solenoid-like levogyre moving, making possible the creation of a new astral etheron/galaxy. The first focus of the elliptic light-plane **Photon-Belt** was situated within the former galaxy PHOENIX, the actual one is within the galaxy DRAGON/DRACO, with the suitable elliptic poles SIRIUS respectively VEGA.

The secondary ellipses around the SIRIUS-SUN respectively SUN-VEGA axes are the trajectories of the giant planets NIBIRU respectively HABIRU/Eos/Hemera/Nemesis, with cycles of 3,600 respectively 5,200 years (13). Contrary to Zecharia Sitchin’s remarkable Sumerian decipherings [23] – referring only to the NIBIRU – both giant planets and their surroundings contributed with a determinant role to the evolution of the Solar System, between others to the creation of the new human-types Elohim-Nefilim-Annunaki within the Hemera-octaves 666666-444444-222222 BC, Pythec-antropus, Neander-thalian, Cro-magnonian, Homo Sapiens and Homo Sapiens Sapiens during the last millenia (12). There are remarkable the quasi-simultaneously visits on the Earth (13), especially after its conquest by both conquerings almost simultaneously in 273,800 respectively 273,580 BC, and after the Nibiruan domination during the Atlantic and Tibetan civilizations (14,15).

Terrestrial projection of the Photon-Belt

Energetic system and tectonic evolution of the Earth

During the 1950-s, the former Russian researchers V. Makarov and V. Morozov elaborated two basic theories referring to the forming and functioning of our planet EARTH, namely the – **in between in two divided – former separation circle** created at the splitting in two of the giant planet TIAMAT, forming the EARTH and the that time not yet destroyed LUNA, respectively the **multilevel energy-net of the renewed spherical EARTH (16)** [24], long ago forgotten, respectively known as „Becker-Hagens Planetary Grid”, presented as a superposed triangular-pentagonal terrestrial superficial energy-system, but in reality being a multi-intersected Earth-central **triangular and pentagonal pyramid-system** [24], namely the dodecahedral-icosahedral crystalline structure of the EARTH, with less known energetic implications, both underground and supraterranean. The spheroid-shaped planet with this grid composed by superposed 12 pentagons and 20 triangles on its surface, thus 62 intersection points including the two poles, in fact is a central-started fractal-like structured interpenetrating conoidal dodecahedral mixture, decomposable in 120 unicentral tetrahedra [24]. The terrestrial energy-system contains other rectangular and diagonal line/pyramid-systems, which together form its MATRICIAL SYSTEM.

Really, this MATRICIAL URBANISTIC SYSTEM is present **on the whole Earth, but not only on its surface!** In the last hundreds of millennia the sinking and rising of the ocean-floor repeated systematic, like a respiratory process, manifested as simultaneous sinking and rising of the quasi-continents ATL, MU and MA, known as ATLANTIS within the **Atlantic Ocean**, MU-MUKULIA-MURROR within the **Pacific Ocean** and LEMURIAKUMARI KANDAM within the **Indian Ocean (16)** – called by me „the sincron swimming of the 3 whales” – in contrast with the simultaneous lifting of the affected continental areas, known as „Deluges” or a single „Deluge” within the common human consciousness and in the Bible. This process took place after the last ice-period, mainly around 50,000-30,000-10,000 BC (12,14,15), when disappeared whole intracontinental seas, e.g. in **Suoth-China/Fuxian** and **Mongolia/Gobe** on the **Eurasian continent (17)** – within the former Asian projection of the constellation Dragon/Draco, later similarly within its European projection inside the Carpathian/Adria/ Ripei Mountains, the Pannon Sea and Fairy Sea –, respectively in **North-Africa (18)** the actual **Sahara-Desert**.

North-African projection of the Photon-Belt

The mirrored projection of the PHOTON-BELT on the North-African – South-European territory is realized 4 M years ago, at the LEO COSMIC PERIOD, start of the PHOENIX ERA, marked by the former (actually underground) REGULUS-PYRAMID with the sculpture of the LION – watcher and symbol of the PHOENIX – within its pyramidion (the head being transformed/remodelled with carving only around 1,200 AD). That time the etheric-material transitional PHOENIX constituted the main focus of the PHOTON-BELT, corresponding to its 3rd and 4th evolutionary phases, with accentuated cosmic connection between the worship/cult of BABBA in the **ADRIA MOUNTAINS/Ripei/Carpathians**, with the cultic centres at the peaks/pyramidions OMUL/Babele and SFINX, Ceahlau, Retezat, Shumuleu and many others, and of the Egyptian BIG ENEAD (11) under the actual **ENEADLAND (20)**, but with 450 m deeper at the actual ground level (19). **The ENEAD-ADRIA MOUNTAIN connection corresponds to the SIRIUS-SUN AXIS OF THE PHOTON-BELT**

Another focus of the Eurafrian Photon-Belt projection is constituted

by the **ATLAS-MOUNTAINS**, which really the projection of the loadstar VEGA is, the other stars of the constellation LYRA being present in form of peaks on the Saharian territory, inside the Photon-Belt projection (18). This territory was many times under water, in correlation with the sinking and rising of the Atlantic Ocean’s level, being S-W part of the **former sank tectonic shield ADRIA**, on which border was situated the famous **Atlantic ISLE of Platon**, within the **ADR(I)AR region (19)**. In fact, the Platonic „Eden” was situated at the coast of this **ADRIAN plateau/ISLE** surrounded by the former **ADRIA SEA** – including the actual North-African and South-European territory, with the whole actual Mediterranean Sea – as „side-sea” of the Atlantic Ocean. So, the **Isle of Poseidon** was a **creek** of this SEA, with the annexed **Fortress of Poseidon**, but with a superposed description of the quasi-continental **Atlantis** within the rising periods, before the sinkings of the ocean floors at least in 50,000-30,000-10,000 BC. The elliptic **ADRIA-shield** is surrounded at the North by the mountain-chains Pyrenees-Alps-ADRIA Mt/Carpathians, so its focuses **ATLAS Mt – ADRIA Mt** form the **VEGA-SUN axis of the Photon-Belt**.

Applications of the 3-elliptic Photon-Belt projection

Reconsideration of the former Phoenix territory

The above presented projection of the **Photon-Belt** includes in this way the main elements of the 3-elliptic model with both focuses of the main elliptic **Photon-Belt** and the third common focus of both secondary ellipses (19). The African South-border extends in form of **Sahel-Belt**, continuing to the East on the Arabic Peninsula, all this belt being the most disadvantageous territory, caused first of all by the **effect of the Photon-Belt projection**, but in correlation with a very differentiated vegetation among the months February and August. For this reason, it is recommendable the examination of this territory within the deep of 450 m, till the former ground level.

Restructuring of the former Adrian territory

This territory refers really to the very agitated whole EUROPE and N-W AFRICA, the former JORUBALAND, situated on the former sank tectonic shield ADRIA. For this reason, is anachronistic the idea to organize Europe without taking into consideration the geographical conditions, differentiated in conformity with the Adria-shield, insular/peninsular or continental position, historical traditions, and separation from America. So it’s absurd to demand a parcelled out United States of Europe instead of the historical traditional State-Unions. Based on these considerations proposed I’ (21) the grouping of the state-pairs connected to the mountains Adria/Carpathians, Alps and Pyrenees situated on the Adria-shield, the insular and peninsular countries, and the transitional states, with a dynamic alternating coordination versus the actual obsolete static pseudo-coordination [25,26].

Conclusions

Within my earlier short syntheses and in the present summarizing “**synthesis of syntheses**” is outlined the trial to present the COSMIC EVOLUTION within the **quaternionic frame** of the SPACE-SPACETIME-TIME of the CONIC-TOROIDAL MODEL. Because the 3-ECO events on PHYSICAL LEVEL take place in SPACETIME, namely at the intersection points of the ELLIPTIC LIGHT-PLANE and of the DANDELIN-CIRCLE with the **conic surface**, through the **conic generator perpendicular to both**, the longitudinal axis of the ellipse and the radius of the Dandelin-sphere, the increasing rectangular squares evolve around the **conic axis** with the Dürerangle of 76°, namely within the life-zone. The first/start-point of this **conic generator** being the APEX, from which starts a LIFE-SPIRAL, evolving through the suitable BIONS, such a trajectory is usually unchangeable. So, by the – in general

timeless – visions is possible to change the date of the events, but not their happening too! For example within both (and probably many other's), Hildegard von Bingen's (1170) [27] and my (2010) [24] visions refer to the destroying of America, but without prevision of the point of time, which is very actual today!

Otherwise, the possibility to prevent any world war for a long time is the direct transfer of Alaska from the USA to CHINA, solving in this way the previsible conflicts between USA-Russia, Russia-China and China-USA, with a concomitant social-economic-environmental restructuring at the start of the 6th Photon-Belt phase [28].

The cosmic projections being reciprocal, it's possible to reverse the malefic effect of the **Photon-Belt projection** within the SAHEL-BELT in AFRICA, realizing a viable VEGETATION-BELT in correlation with the research of the whole underground of the SAHARA territory till the 450 m deep, the former ground level of this zone (19), solving at the same time the intolerable social-economic situation, especially in this territory.

From the **superposition** of both – NIBIRU and HABIRU – **matrices** on ASTRAL LEVEL (13), because of the similarity with the PHYSICAL LEVEL (and with the other cosmic levels), results the possibility to jump from the classical **bivalent** to the future **multivalent** logical thinking, namely from the informational process based on **BITs** (1/0) to the expanded informational world based on **QUBITs** (1/0/**superposition of both states**).

14 – NIBIRU CYCLES ON THE EARTH (1 SAR=3,600 YEARS)

(14)

THE CONQUEST OF THE EARTH BY THE NIBIRU WAS IN 273,800 BC, THE FIRST RULER WAS ENKI, WHO SEPARATED THE MALE ALULHIM AND FEMALE ALULGOR WITHIN 1.-15. SARS, AFTER 8 SARS IN 245,000 BEING CHANGED BY ENLIL WHO RULED 10 SARS TILL 209,000 BC. FROM THIS DATE THE NEW RULER EN.MEN.LO.ANNA MOVED THE CAPITAL FROM ERIDU TO BAD TIBIRA (CITY OF THE CUPPER WORKERS) BUILT 2 SARS, IN 201,800 STARTING THE MINING AND PROCESSING OF THE NON-FEROUS METALS, TRANSPORTED TO THE NIBIRU. AFTER THE REVOLT OF THE IGIGI WORKERS IN 187,400 BC, ENKI AND NIN.HUR.SAG WAS CREATE THE FIRST CROSSBRED NIBIRUAN-TERRESTRIAL ATHLETIC BLACK MAN TYPE, FOR METAL MINING AND PROCESSING INSTEAD OF THE IGIGIS BECOMING WATCHERS AND THROUGH CROSSBREEDING WITH THE TERRESTRIAL WOMEN CREATED THE MANKIND. AFTER THE 101,000 BC CATASTROPHIC WAR AND 72,200 BC TOBA SUPERVOLCANO TOOK PLACE THE 50,600 DELUGE, THE FIRST SIMULTANEOUS SINKING OF MUKULIA-MADURAI-ATLANTIS, CREATION OF ADAM, START OF THE EGYPTIAN CIVILIZATION, FOLLOWED THE PLEYADIAN CONQUEST IN 32,600 BC, ENDING THE NIBIRUAN DOMINATION ON THE EARTH.

(JOO, D.: TERRESTRIAL PROJECTIONS OF THE COSMIC ENVIRONMENTAL CONNECTIONS, 2017):
 BETWEEN THE GLOBAL CATASTROPHES 50,000 BC AND 32,600 BC (SINKING OF THE CONTINENTS MU IN THE PACIFIC, MA/LEMURIA IN THE INDIAN, AND ATL IN THE ATLANTIC OCEAN), THE WHOLE EURASIAN CONTINENT – THE BIG UIGUR EMPIRE – FORMED A HUGE DOVE-LIKE BIRD WITH TWO-TWO WINGS (ARCHANGEL QUALITY) TO NORTH AND SOUTH, BILL TO EAST (THE KOREAN PENINSULA), EYE (THE JEWISH AUTONOMOUS REGION AT THE AMUR-BEND, EAST- RUSSIA), CROP (ASIAN CARPATHIANS), LEGS (ARABIAN PENINSULA), BOTTOM (EUROPEAN CARPATHIANS), AND TAIL (WESTERN EUROPE). THE ASIAN AND EUROPEAN CARPATHIANS ARE THE PROJECTIONS OF THE CONSTELLATION DRAGON, FORMED 500-250, AND 15-9 MILLION YEARS AGO. SIMILAR TO THIS E-W MOUNTAIN-CHAIN/FOUR-WINGED EURASIAN BIRD, THE N-S MOUNTAIN-CHAIN/AMERICAN DOVE EXISTS TOO (J. J. HURTAK'S ENOCH KEYS). ON THIS EURASIAN CONTINENTAL UNITY WERE CREATED THE UI-GURS = NEW PEOPLE, BETWEEN OTHERS – IN CONFORMITY WITH DR. FEJES PAL'S EPHYGRAPHIC DECIPHERING – THE MATRIARCHAL EEM.HUL (GOBE/SEKEL – MAGUR/HUNGUR) AND PATRIARCHAL HU.TU PEOPLE, INITIAL 6+1 TRIBES, A PATTERN ADOPTED BY THE HUNGARIAN EUROPEAN CONQUIST TOO. THUS, THE PLACE OF EUROPE IS INSIDE THIS UNITY, NOT IN THE AMERICAN ONE. ON THE AFRICAN CONTINENT EVOLVED THE JORUBA CIVILIZATION IN THE N-W, IN CONNECTION WITH THE PROJECTION OF THE CONSTELLATION LYRA, AND THE EGYPTIAN CIVILIZATION IN THE N-E, WITH PROJECTION OF THE CONSTELLATIONS LEO, GEMINI, CANIS MINOR, CANIS MAJOR, ORION AND TAURUS, SITUATED ALONG THE PHOTON-BELT (THE NILE RIVER), BEING MARKED BY PYRAMID-COMPLEXES.

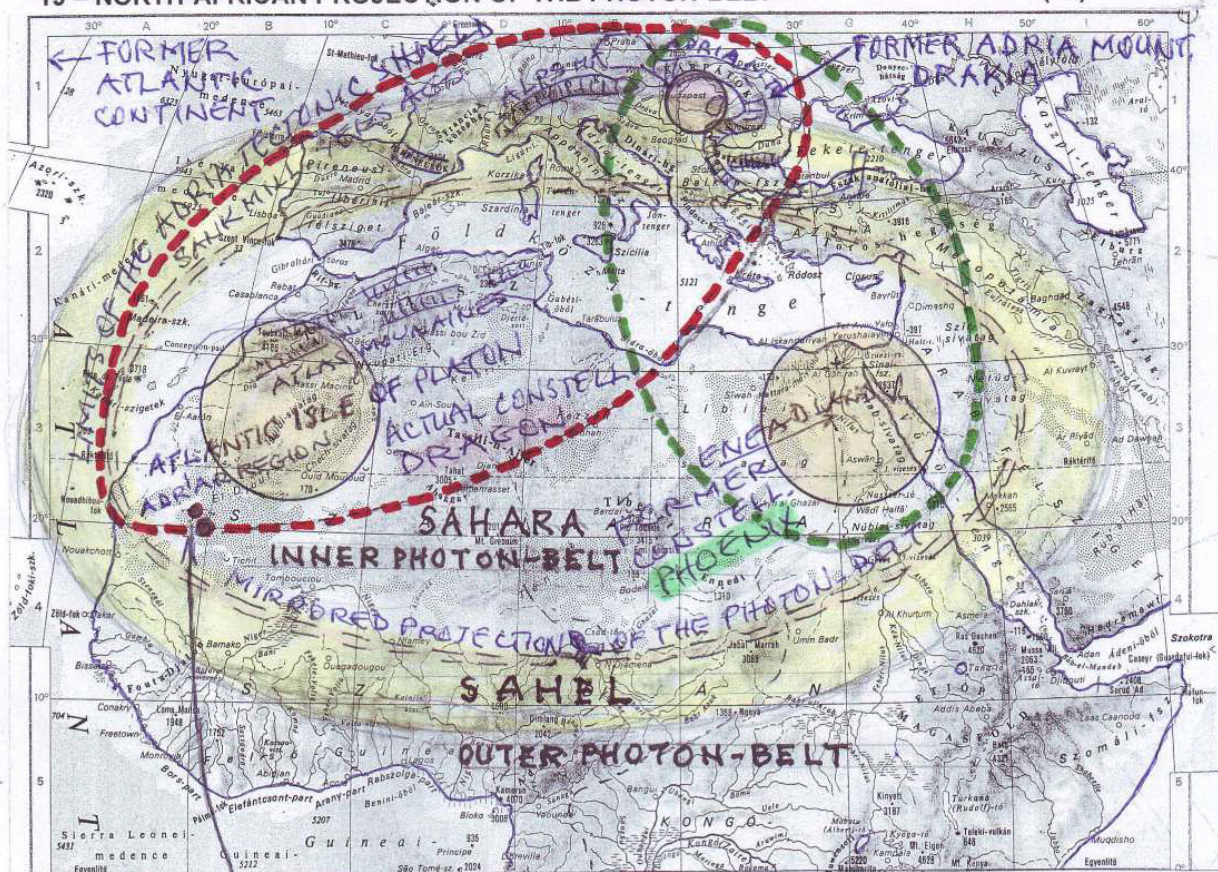

18 – AFRICAN MATRICIAL URBANISTIC TERRITORIES

(18)

19 – NORTH-AFRICAN PROJECTION OF THE PHOTON-BELT

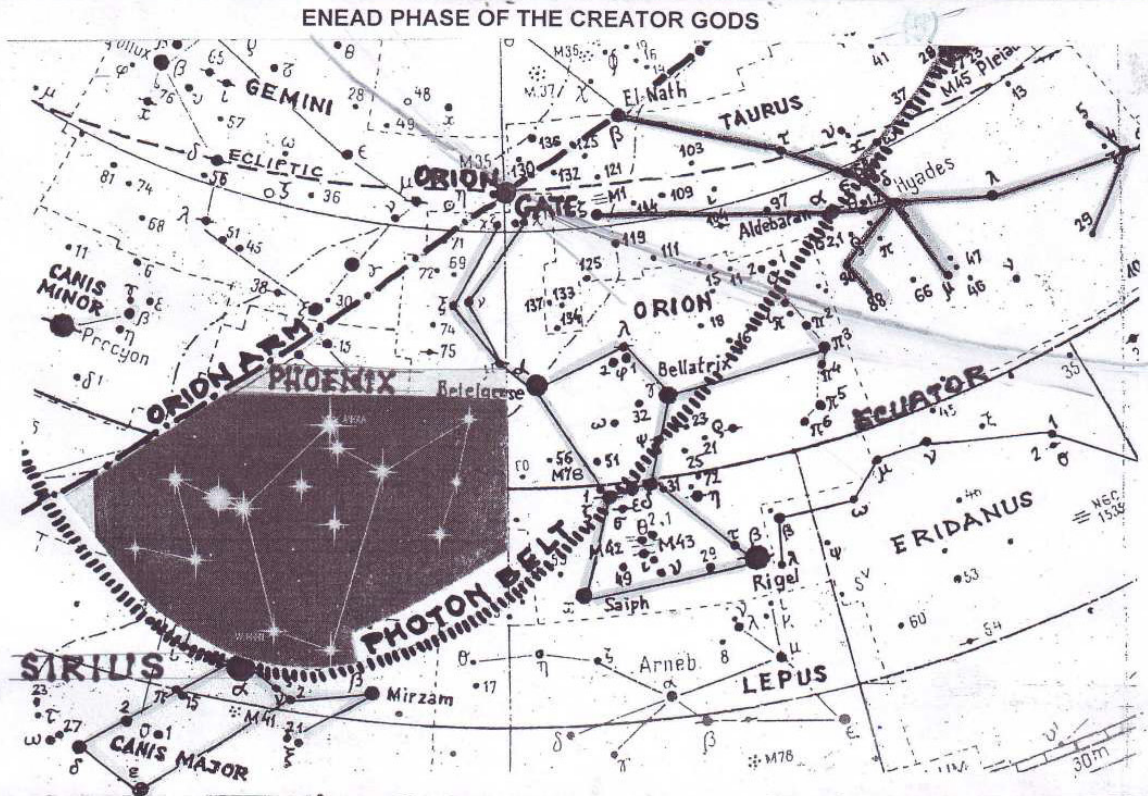

(19)

Kepek © TerraMetrics, 2024., Térképadatok © Google, 2024. 10 mi = 26 mm = 16 km

20 – PROJECTION OF THE FORMER PHOENIX CONSTELLATION

(20)

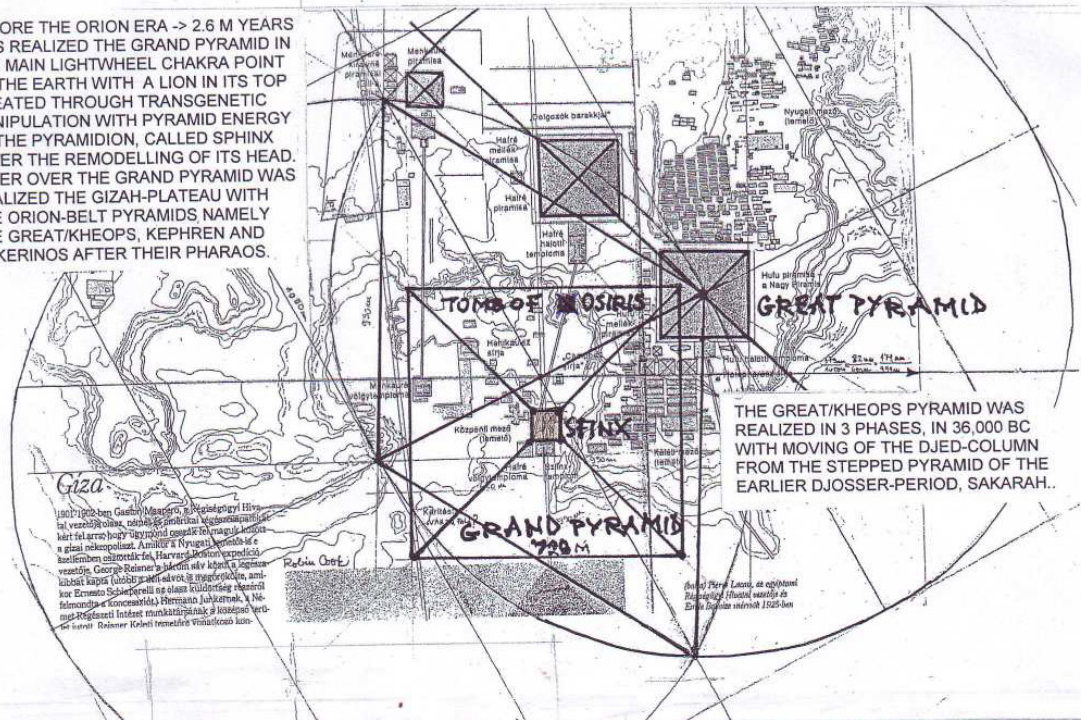

5.2-43M - PHOENIX/ENEADLAND - FORMER FOCUS OF THE PHOTON-BELT

FORMER/UNDERGROUND PHOENIX/REGULUS/GRAND PYRAMID 720MX720M, H=510 M	1) VIRTUAL TOP OF THE PYRAMID(ION)	+60 M
	2) SPHINX PLATFORM/PYRAMIDION BASE	+/- 0.00 M
	ACTUAL GROUND LEVEL	
	3) SUPERIOR THIRD OF THE PYRAMID	-110 M
	4) INFERIOR THIRD OF THE PYRAMID	-280 M
	5) FORMER GROUND LEVEL	-450 M

ORION-BELT PYRAMIDS AT THE GIZAH-PLATEAU

BEFORE THE ORION ERA -> 2.6 M YEARS WAS REALIZED THE GRAND PYRAMID IN THE MAIN LIGHTWHEEL CHAKRA POINT OF THE EARTH WITH A LION IN ITS TOP CREATED THROUGH TRANSGENETIC MANIPULATION WITH PYRAMID ENERGY IN THE PYRAMIDION, CALLED SPHINX AFTER THE REMODELLING OF ITS HEAD. LATER OVER THE GRAND PYRAMID WAS REALIZED THE GIZAH-PLATEAU WITH THE ORION-BELT PYRAMIDS, NAMELY THE GREAT/KHEOPS, KEPHREN AND MYKERINOS AFTER THEIR PHARAOS.

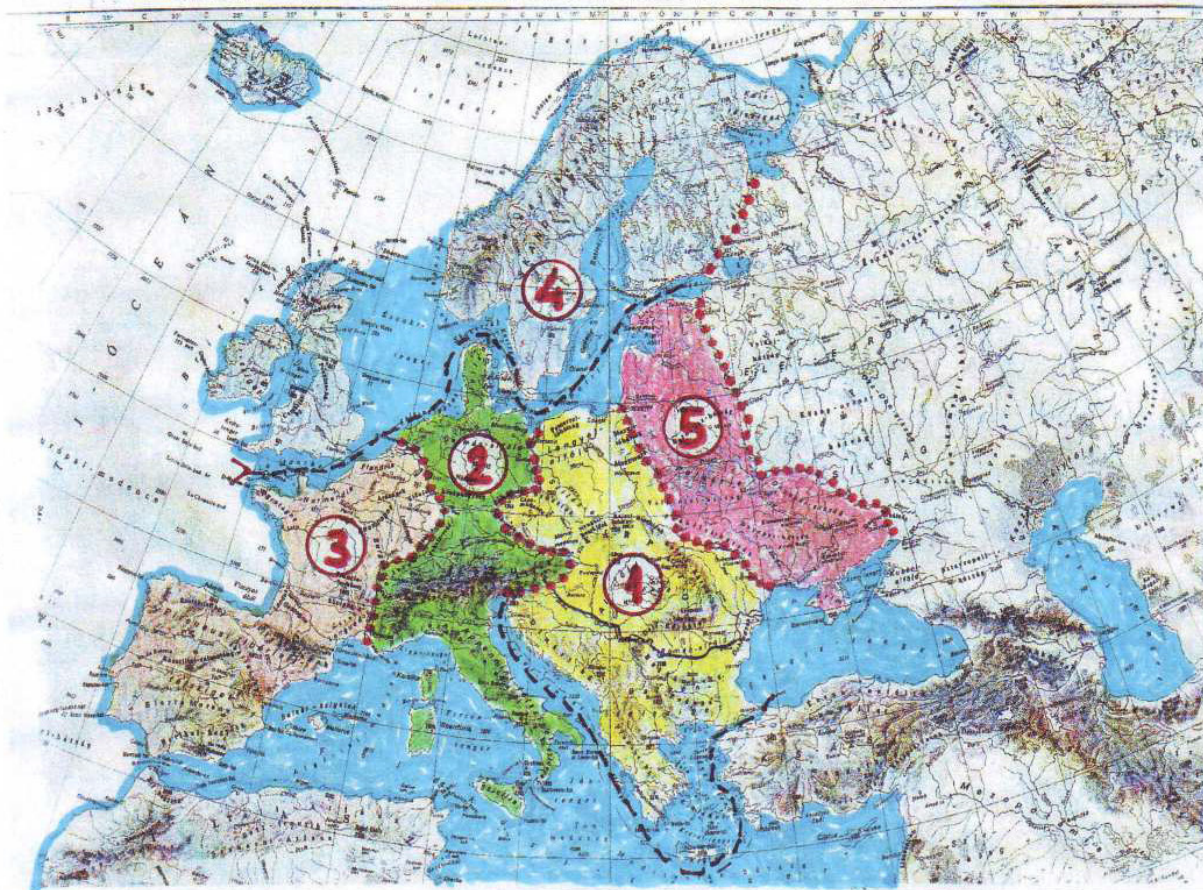

THE GREAT/KHEOPS PYRAMID WAS REALIZED IN 3 PHASES, IN 36,000 BC WITH MOVING OF THE DJED-COLUMN FROM THE STEPPED PYRAMID OF THE EARLIER DJOSSER-PERIOD, SAKARAH.

21 – RESTRUCTURING OF THE FORMER ADRIAN TERRITORY

(21)

EUROPEAN CONTINENTAL AREAS' FUNCTIONING MODEL

- ① – Central-East European Area: Drakya=Dakya+Trakya;
- ② – Central-West European Area: Former German-Roman Empire;
- ③ – West-European Area: Former Franch-Iberic Kingdoms;
- ④ – North-European Area: Skandinave-British Kingdoms;
- ⑤ – East-European Area: Former Socialist Countries.

About Author: Dénes JOÓ, after the „Ion Mincu” University of Architecture and Urbanism in Bucharest, he studied Mathematics, Economy, Sociology in Cluj-Napoca-city, and Postgradual Settlement and Regional Planning in Bucharest, and parallel with all these Physics, Chemistry, History, Astronomy, Philosophy and other scientific disciplines without limits (and titles). Elaborating new mathematical prognosis models, he extended the **Futures-Research** to the **Systemic Evolutions Research**, as a new synthesis in the science, extending it from the terrestrial to the cosmic evolution, from the micro- to the macro-world, including the **pyramids research**. The results are reflected in the extended **Whole Periodic System** (denesjoo.wordpress.com) and other studies.

Budapest, 15th February 2018.
